

SANCLEANER

ACIDIC CLEANING AGENT FOR SANITARY PORCELAIN *concentrate*

Sancleaner is a cleaning agent for sanitary porcelain, toilets, bathtubs, sinks, bathroom tiles and their joints. Effectively removes dirt, corrosion and deposited salts, as well as the smells caused by them. Suitable also for cleaning surfaces made from copper, brass, bronze and stainless steel, also for removing calcification from shower heads and other surfaces.

PRODUCT PROPERTIES

- almost odourless
 - very fast-acting!
-

USAGE

Apply on the surface with a sponge or a brush, allow to take effect for 5-10 minutes, rub if necessary and rinse surfaces. When diluting, add the necessary amount of concentrate into the water.

Daily cleaning of tilefloors and surfaces: 5-50ml of concentrate for 5L of water

Rust removal from toilets and tile-surfaces: dilution of 1:4 or as concentrate

Removal of calc and calcifications from shower heads: 1:2 dilution

STORAGE

See the best before date on the package. Store at room temperature, keep away from direct sunlight and avoid freezing to assure the quality of the product.

UTILIZATION

Product is ecologically safe, all active ingredients are biodegradable in flush water. Plastic packaging materials are recyclable. For collection, the plastic packaging is suitable when rinsed, the bottle and cap separated. The packaging box is sorted for cardboard collection. The compatibility of the packaging and the product is quality assured.

SAFETY INFORMATION

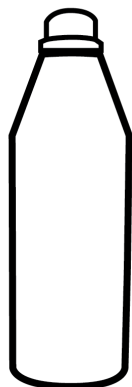

See the product safety data sheet for additional safety information.
